

Steps to Run Wildfly (JBoss)

1. Navigate to the **Wildfly Root Folder**.
2. Go to the **bin** directory.
3. Double-click on **standalone** (Windows batch file).

Steps to Stop Wildfly (JBoss)

1. Press **Ctrl + C** in the command prompt.
2. Press **Y** when prompted.

Steps to Change Wildfly (JBoss) Port Number

1. Navigate to the **Wildfly (JBoss) Root Folder**.
2. Go to the **standalone** directory.
3. Navigate to the **configuration** directory.
4. Open **standalone.xml** in a text editor (e.g., Notepad).
5. Find the **socket-binding** line.
6. Change the port number, e.g.:

```
<socket-binding name="http" port="${jboss.http.port:8080}"/>
```
